

Evaluation Report

Section 1: Chatbot NLP • Section 2: Multilingual Language Selector

Evaluation Metrics Included

Chatbot NLP: support counts, top-2 accuracy, false positive/negative rates, intent confusion, end-to-end success

Technical Evaluation: Accuracy, Precision, Recall, F1-Score.

System Evaluation: Response Accuracy, Intent Recognition Rate, Multilingual Accuracy.

Multilingual Selector: overall accuracy, per-language accuracy, top-2 accuracy, fallback rate, override rate, calibration

All supported languages are evaluated and reported in both sections.

Include language coverage, per-language accuracy, and evaluation details for both Chatbot and Multilingual selector.

Section 1: Chatbot NLP

Intent classification and chatbot understanding metrics

Evaluation Metrics Included

Supported languages:

en, fr, es, pt, tl

Covered languages for Chatbot NLP and multilingual evaluation.

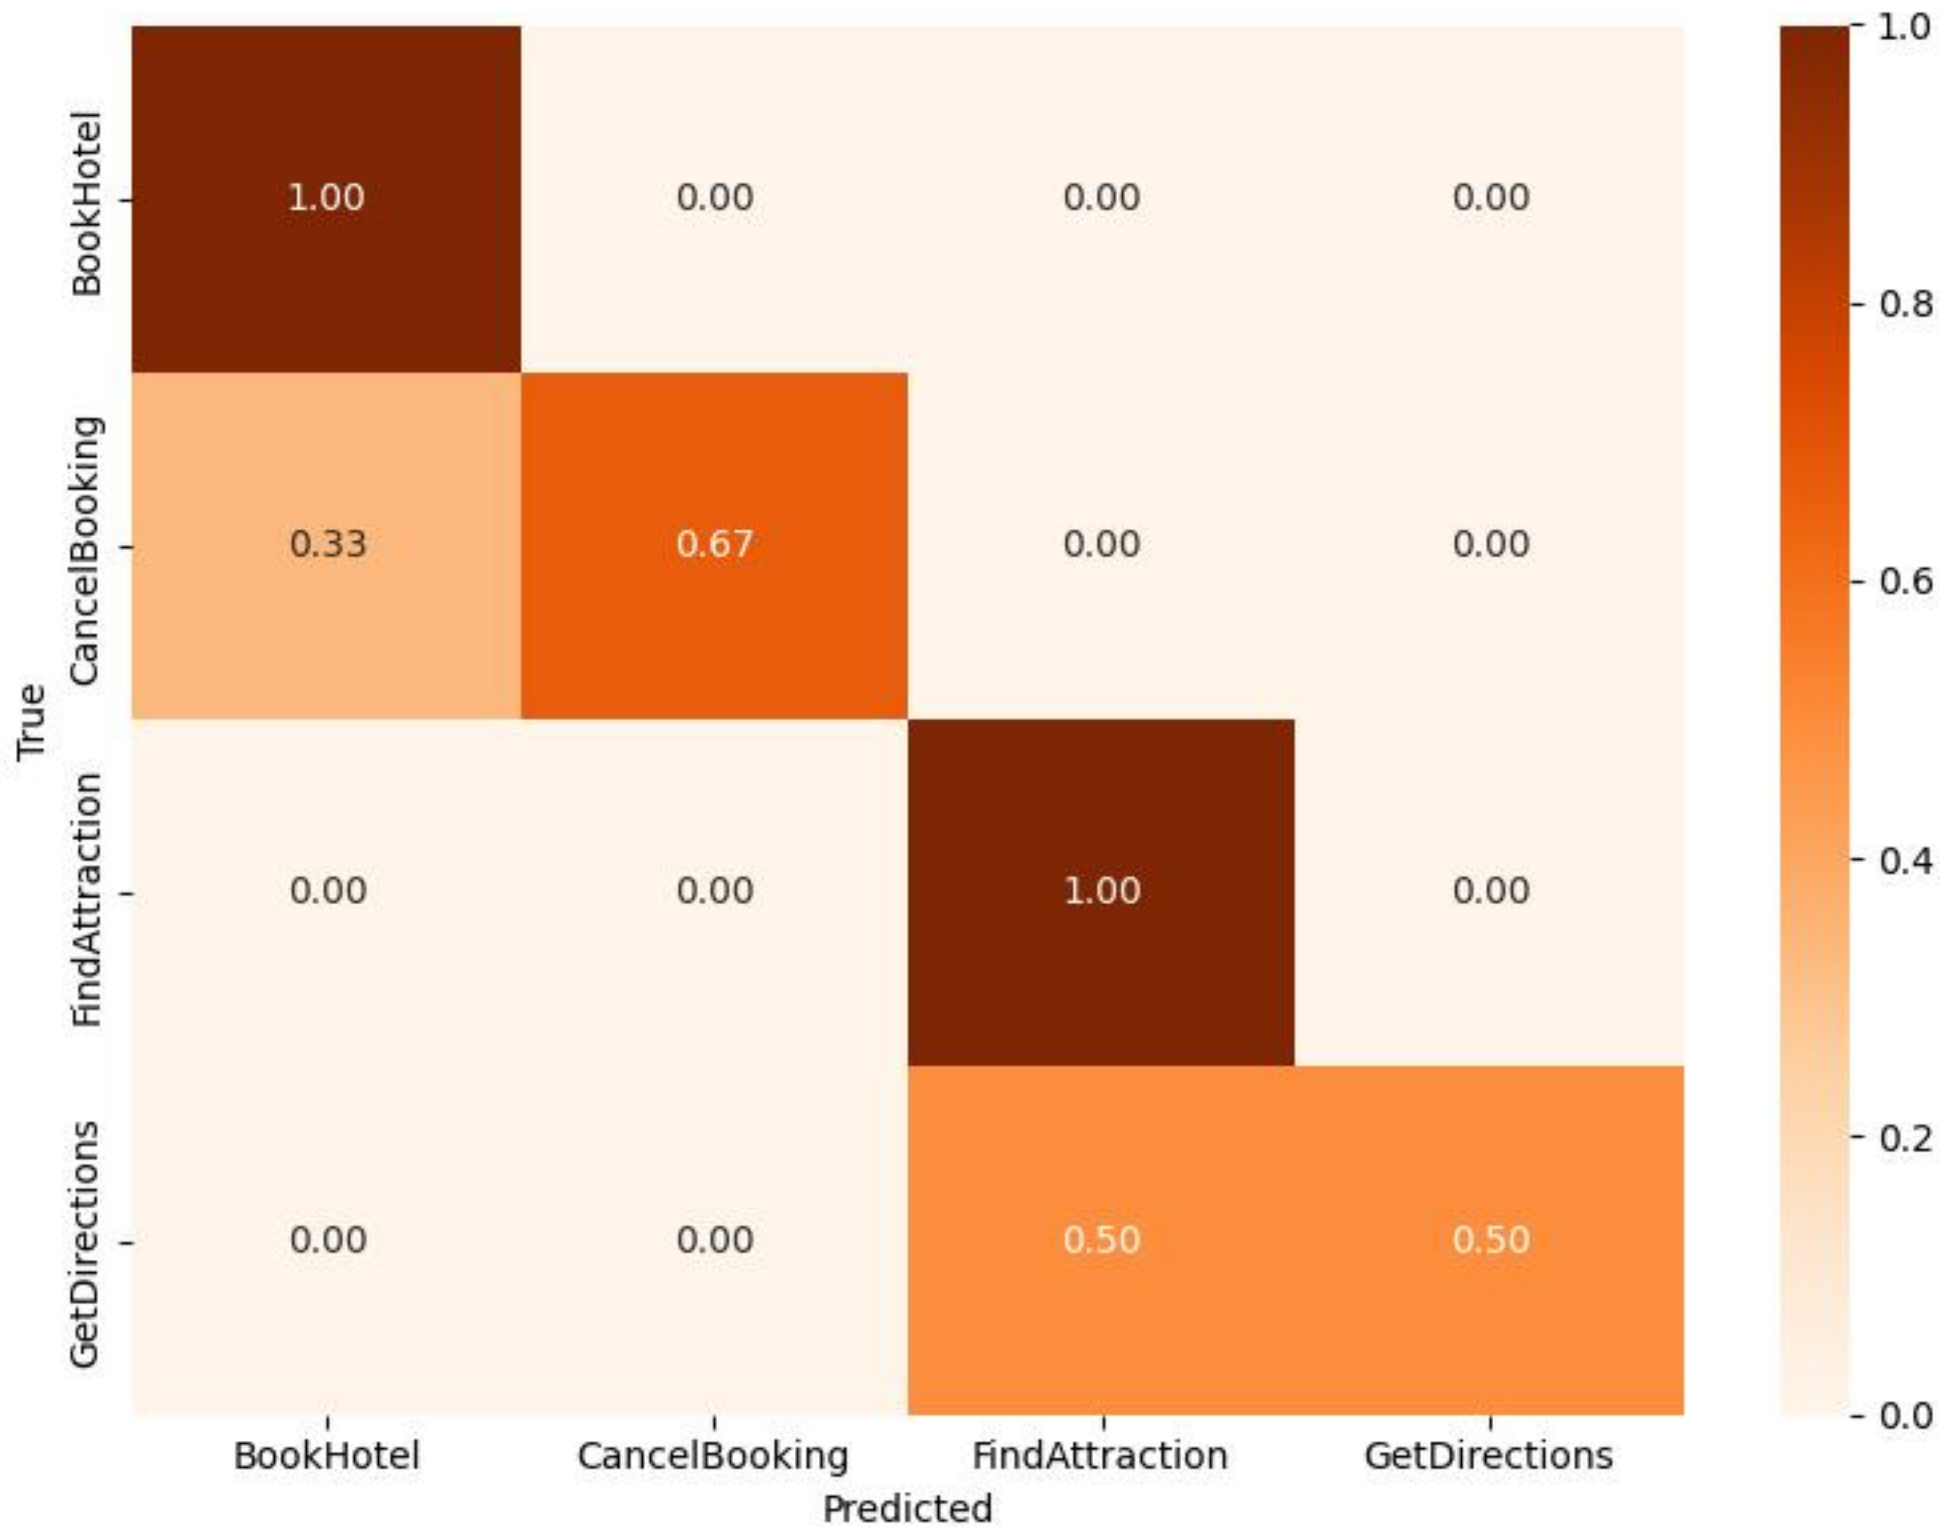

Table: Per-Intent Metrics

Unnamed: 0	precision	recall	f1-score	support
BookHotel	0.667	1.0	0.8	2.0
CancelBooking	1.0	0.667	0.8	3.0
FindAttraction	0.75	1.0	0.857	3.0
GetDirections	1.0	0.5	0.667	2.0
accuracy	0.8	0.8	0.8	0.8
macro avg	0.854	0.792	0.781	10.0
weighted avg	0.858	0.8	0.79	10.0

Table: Per-Language Accuracy

language	accuracy	count
en	1.0	2
fr	1.0	2
es	0.5	2
pt	0.5	2
tl	0.5	2

Chart: Chatbot NLP — Intent Classifier Confusion Matrix

Section 2: Multilingual Language Selector

Language identification metrics and confusion analysis

Evaluation Metrics Included

Supported languages:

en, fr, es, pt, tl

Covered languages for Multilingual evaluation and language selector metrics.

Chart: Language Selector — Accuracy Bar

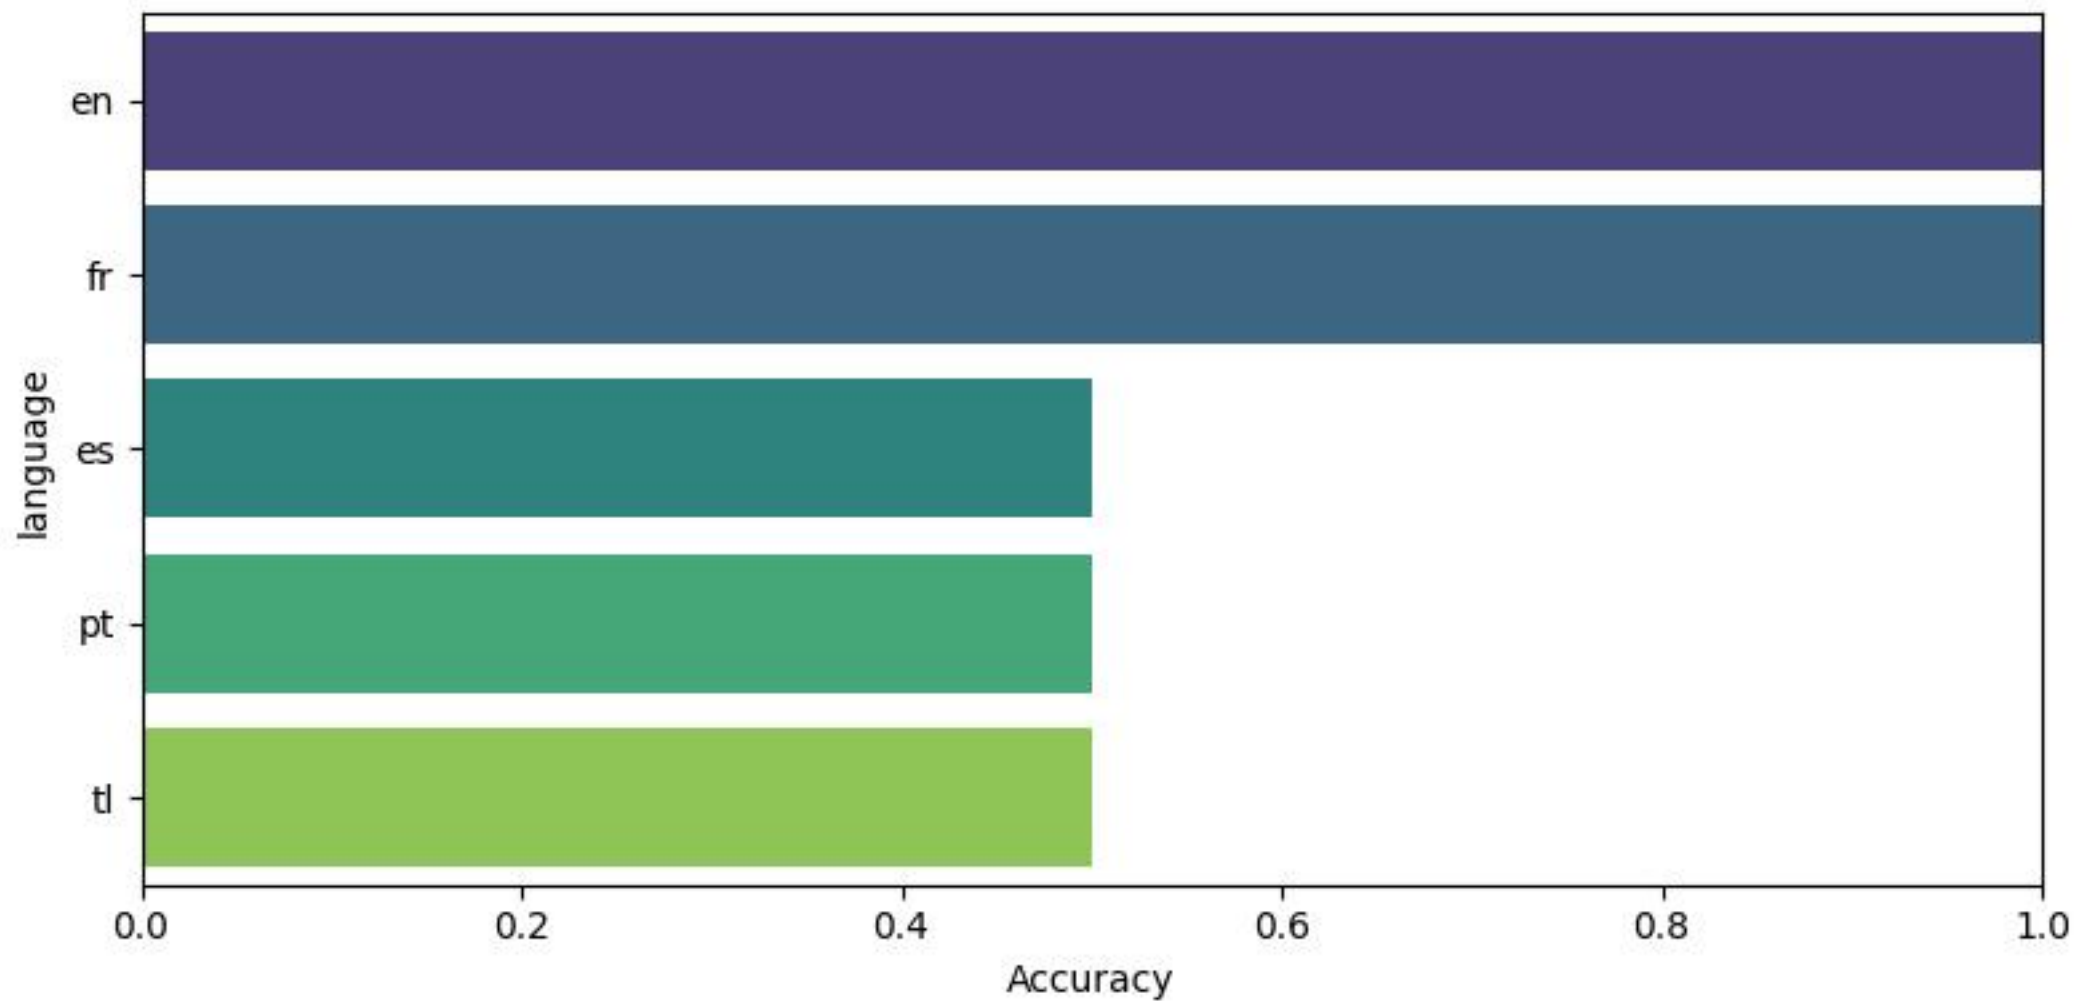

Chart: Language Selector — Confusion Matrix
